### ***Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-15 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-23 of U.S. Patent No. 6,375,876.

Although the conflicting claims are not identical, they are not patentably distinct from each other because it is submitted that the term “solvent” as used in clause a) of claim 1 of the application fully encompasses a solvent comprising two constituents, as in claim 1 of the patent. Given the solvents claimed in claim 15 of the patent and claim 13 of the application, and the aspect in claim 21 of the patent that compound B may comprise as little as 1% of the solvent, it is submitted that when the test set forth in the “wherein” clause of clause d) of the application is conducted for the constituents claimed in the patent, the resultant temperature range for the demixing temperature would inherently be met.

***Response to Arguments***

3. Applicant's arguments filed Feb. 1, 2008 have been fully considered but they are not persuasive.
4. Applicant argues that the result of using the same materials of Kessler which are the same in the applicant's dependent claims would not inherently meet the limitation of the demixing temperature of a solution of 25% by weight of the at least one polyolefin and the solvent is 10-70 degree C above the solidification temperature. However, the same materials should have similar properties. For example, Applicant's claim 13 claims a mixture of Kessler compound A "dioctyl phlatate" and compound B "N,N-bis(2hydroxyethyl)tallow".
5. Applicant argues that compound B is a non-solvent in Kessler. However, the same compound B material (see claims 16 and 18) is a solvent in the application (see claims 13 and 14). Therefor, the resultant temperature range for the demixing temperature would have been inherently met.
6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
